., it is possible to operate in the future a mixture of cleaning and heating system, which results from the heating of hot water at temperatures of up to 70°C. A further advantage is the much more effective utilisation of thermal energy compared to the injection of hot air. This provides energy savings of up to 55%. In addition, combustion of the cleaning vapours without the use of a catalyst allows the temperature to be controlled to 50°C. This allows the use of heat in the form of a mixture of hot water and steam to be fed through the grout and prevent it from being affected by the steam, which is used for cleaning the washed out material. The steam is thereby heated to a temperature of up to 90°C. The resulting cooling effect acts to prevent the steam from penetrating into the grout, which is not cleaned well enough. This system has been successfully installed in two pre-insulated plywood houses in the Netherlands. 19 J. Meyer Deon..., Nieuwland.. DEON 2006, Utrecht, The Netherlands, Lou GobleJohn-Jules Ch. Meyer.. 19 Uur Meyer Deon..., it is possible to operate in the future a mixture of cleaning and heating

system, which results from the heating of hot water at temperatures of up to 70°C. A further advantage is the much more effective utilisation of thermal energy compared to the injection of hot air. This provides energy savings of up to 55%. In addition, combustion of the cleaning vapours without the use of a catalyst allows the temperature to be controlled to 50°C. This allows the use of heat in the form of a mixture of hot water and steam to be fed through the grout and prevent it from being affected by the steam, which is used for cleaning the washed out material. The steam is thereby heated to a temperature of up to 90°C. The resulting cooling effect acts to prevent the steam from penetrating into the grout, which is not cleaned well enough. This system has been successfully installed in two pre-insulated plywood houses in the Netherlands. 32 J. Meyer Deon.. DEON 2006, Utrecht, The Netherlands, Lou GobleJohn-Jules Ch. Meyer.. 32 Uur Meyer Deon.., today cleaning the walls with steam is not possible, since the steam cannot be used in the house as a heating source. A further advantage of this system is that in the winter, heat can 82157476af
