This game is a lot of fun. I just finished my first playthrough (I must not be as smart as other reviewers, I got my @ss handed to me). I really look forward to more features being added to the game, and (please, please please) hopefully Steam Workshop/Mod support. For the price, I give this one an enthusiastic "buy".. best Game i have ever played in my life! 10V10! hope this gets game of the Year. It's the best game about hiphop I even know.. Overall a good game with several parts lacking. For example in the recruitment page could have a filtering and search buttons based on stats or a particular trait. Also there is seemingly huge gap between some agents which makes several of them completely useless. In result i ended up using only portion of the agents over and over again through my different games. Also, spouse seems useless other than eliminating that agent for that game or that's what i think maybe there is a functionality i haven't figure it out yet.. So I encountered a game breaking bug about 45 minutes in. My camera view got stuck "inspecting" an object that was offscreen and nothing I did allowed me to move on. Upon relaunching, my save was gone and it started me from the beginning. From the short time I played this, it essentially seems like a less refined and less impactful version of "Visage" which is another horror game on Steam with PT elements.. found it boring. only played for a few minutes and decided to uninstall. Needs more interactions. Storyline was ok however there was not much that you can do beside read the storyline and answer questions. Not for me.. Nominated for "Worst Game Ever" award :). First challenging DLC out of the bunch. Mission takes place only during the first era. So you have to finish the mission before your mandate runs out. The randomness of the mandate length bonuses\penalties and the constant earthquake distasters make it a challenge.

Dont bother it donkey♥♥♥♥♥EU severs run by roland rat aint been able to play for a month its a steaming peace of donkey do. SAVE YOUR MONEY. This game is hilarious and awesome!. I actually like this game and fun playing but there are still few glitches. For example, sometimes your player is by the ball and you try to return the ball and you character does nothing...weird. It happens a lot when receiving a serve which is frustrating. I do like the gameplay when it does work and yes the commentary can be repetitive but not a big deal for me anyway. Career mode is a lot of fun with the user being able to decide what type of player you want to using skill tree, equipment, coaches and agents.

I still recommend the game when on sale but if they fix these glitches in the gameplay, then you have a winner!. stupid easy until bonus levels when you actually have to try. jarring change  
wouldn't have cared about story except it was so bad that it hurt to read.  
just play any other match 3 game really. This game wall so much fun with the original. And now with this remake, it's so much better. I love this game!!
